Summary

Aspiring **UI/UX Designer** and Computer Science undergraduate with hands-on experience designing end-to-end product interfaces in **Figma** – from mobile attendance apps to data-heavy ERP dashboards and e-commerce experiences. Comfortable owning a design from **wireframe to high-fidelity screen**, with a strong eye for visual hierarchy, color systems, and translating complex data into clear, usable interfaces.

Education

Parul Institute of Technology, Parul University

B.Tech in Computer Science & Engineering

2023 – Present

CGPA: 7.6, Vadodara, Gujarat

Shriman Bhausaheb Zadbuke Mahavidyalaya

Higher Secondary Certificate (12th)

2021 – 2022

Barshi, Maharashtra

Arnav Uchha Madhyamic Vidyalay

Secondary School Certificate (10th)

2019 – 2020

Vairag, Maharashtra

Projects

Personal Attendance Management System | *UI/UX Design, Figma*

Figma Prototype

- Designed a complete **mobile-first attendance tracking app** for college students, including login, live attendance status, and a dashboard view.
- Created dedicated screens for **Dashboard, Attendance, Results, and Timetable**, focused on quick scannability and minimal taps to key info.
- Used a clean **dark navy theme** with high-contrast typography and a bold "LIVE" status indicator to surface real-time attendance at a glance.
- Prioritized clear visual hierarchy so students can check attendance, results, and class schedule without confusion.

Nexora – ERP Dashboard System | *UI/UX Design, Figma*

Figma Prototype

- Designed a full **ERP-style web dashboard** covering Transactions, Interactive Partners, Records, Settings, Analytics, Users, Team, Search, and Security modules.
- Built a data-dense **loan/finance overview screen** combining KPI cards, line charts, and donut charts for fast at-a-glance reporting.
- Structured a left-hand **navigation sidebar** for quick switching between modules, designed for scalability as more features are added.
- Applied a consistent **color-coded card system** (revenue, dues, pending, etc.) to help users parse financial status without reading every number.

Amazing Oil – E-commerce App | *UI/UX Design, Figma*

Figma Prototype

- Designed a **food-delivery-style e-commerce experience** for selling cooking oil, blending UX patterns inspired by **Flipkart** and **Zomato**.
- Crafted bold, **product-first visuals** with strong typographic banners to make oil products feel premium and appetizing.
- Focused on a **familiar, frictionless shopping flow** (browse, select, checkout) by adapting conventions users already know from major delivery and shopping apps.

Technical Skills

Design Tools: Figma, Canva

UI/UX Skills: Wireframing, Prototyping, Visual Design, Design Systems, User Flows

Design Principles: Visual Hierarchy, Typography, Color Theory, Responsive Design

Languages: HTML, CSS, JavaScript

Developer Tools: VS Code, GitHub
